

## Remarks

1. Claims 1-32, 51 and 52 are rejected as being indefinite.

These claims have been cancelled, thereby rendering their rejection moot.

2. Claims 1-9, 12-41 and 44-55 are rejected as being anticipated by Tonkin (US 6,134,568).

These claims have been cancelled, thereby rendering their rejection moot.

3. Claims 10 and 42 are rejected as being obvious over Tonkin in view of MacKay (US 5,718,520).

These claims have been cancelled, thereby rendering their rejection moot.

4. Claims 11 and 43 are rejected as being obvious over Tonkin in view of Sperry et al (US 5,995,723).

These claims have been cancelled, thereby rendering their rejection moot.

5. It is respectfully submitted that neither Tonkin, MacKay or Sperry et al, either singularly or in combination, disclose or suggest: i) a media/finishing attributes operator interface operatively coupled to each of the one or more pages for viewing and/or adding, deleting or modifying the media/finishing attributes of the one or more pages, wherein the media/finishing attributes operator interface for each page may be displayed by selecting the page representation for that page; or ii) providing operative coupling to a media/finishing attributes operator interface available for each of the one or more pages for viewing and/or adding, deleting or modifying the media/finishing attributes by selecting the page representation for the one or more pages.

In view of the above reasons, it is submitted that claims 56-67 are not obvious over the combined teachings of Tonkin, MacKay or Sperry et al and that the application is now in condition for allowance, and notice of the same is hereby respectfully requested.

Respectfully submitted,

---
